ELECTRONIC DESIGN

semiannual index of articles

January-June, 1966

Careers and Management

Committee meetings waste time .....C&M p. 66 ED 5
EE societies: Are they doing enough? .....SR p. U86 ED 6
How does your company rate? .....C&M p. 68 ED 2
Tackle those tough decisions .....C&M p. 76 ED 10
Try designing your career .....C&M p. 70 ED 3
Work hard to get less done! .....C&M p. 70 ED 13

Circuits and Mathematical Analysis

Alarm circuit replaces large nonpolar tantalum capacitor IFD p. 86 ED 2
Amplifier has 85% efficiency .....ART p. 38 ED 5
Avalanche circuit produces ultra fast light pulses .....IFD p. 102 ED 15
Bipolar current source simplifies triangle generator .....IFD p. 130 ED 1
Blueprint for rapid design of high-voltage vhf stages IFD p. 134 ED 1
Bootstrap action yields high Z_{in} wide-band amplifier ...IFD p. 93 ED 10
Carpet plotting is easy.....ART p. 226 ED 6
Cascade circuit arrangement generates sequential pulses.....IFD p. 82 ED 2
Cell and LC network form frequency selective photo relay.....IFD p. 84 ED 13
Circuit converts generator into monopulser unit .....IFD p. 92 ED 10
Circuit provides constant gain and variable dc offset ..IFD p. 80 ED 5
Circuit uses few components for sine-wave frequency doubling .....IFD p. 86 ED 7
Combine reverse agc and diodes .....DD p. 72 ED 10
Complementary monostable circuit has low-standby current drain .....IFD p. 88 ED 4
Current-mode detector is inexpensive and precise .....IFD p. 89 ED 4
Dc-coupled flip-flop acts as Schmitt trigger .....IFD p. 244 ED 6
Design high-frequency amplifiers graphically .....ART p. 48 ED 8
Difference amplifier forms short-circuit detector .....IFD p. 84 ED 3
Diode-resistor network simplifies linear triangle wave generator .....IFD p. 84 ED 7
Diodes ensure start of astable multivibrator .....IFD p. 60 ED 14
Dual 2-input gate forms free-running clock .....IFD p. 90 ED 4
Fast, free-running pulses generated by tunnel diode ....IFD p. 88 ED 2
FET audio signal mixer exhibits linearity, isolation ...IFD p. 242 ED 6
FET-bipolar oscillator features notch network .....IFD p. 102 ED 15
FET circuit measures low-level, subaudio signals .....IFD p. 82 ED 7
FET for ac amplifiers .....NASA p. 79 ED 13
FET impedance converter used in sample-and-hold circuits .....IFD p. 86 ED 7
FET replaces vacuum tube in 1.0-MHz Miller oscillator ...IFD p. 81 ED 5
FET to replace bulky transformer .....NASA p. 116 ED 15
Flip-flop reset circuit requires no diodes .....IFD p. 66 ED 11
Four-layer diodes form 'first one

there' circuit .....IFD p. 80 ED 5
Gain insight into FET amplifiers .....ART p. 40 ED 14
High-speed limiter is efficient ....NASA p. 94 ED 7
Independent astable multi uses adjustable current sources..... .....IFD p. 100 ED 4
Inexpensive null detector is sensitive and accurate .....IFD p. 86 ED 8
Logic-circuit multi yields precise pulse-delay periods IFD p. 98 ED 4
Low-frequency astable circuit uses three inexpensive relays..... .....IFD p. 66 ED 11
Modified monostable flip-flop has improved duty cycle ..IFD p. 81 ED 3
MOS-FET circuit stores input voltage peaks as dc .....IFD p. 76 ED 3
NAND gates form tri-stable flip-flop .....IFD p. 64 ED 11
Need a pedestal-free gate? ....ART p. 58 ED 8
Neon lamp arrangement forms 60-Hz divider .....IFD p. 76 ED 3
New time-voltage integrator has infinite recall .....PF p. U132 ED 6
Nonlinear design yields linearity .....DD p. 76 ED 15
Nuvistor and bipolars form low-noise preamplifier ....IFD p. 108 ED 15
OR gates and RC timing control UJT pulse rate .....IFD p. 84 ED 8
Oscillator-multivibrator combo forms super-regenerative detector ....IFD p. 87 ED 10
Peak-following amplifier provides two outputs .....IFD p. 102 ED 4
Predict common-emitter performance .....ART p. 52 ED 10
Push-button monopulse unit shows clean, ring-free output..... .....IFD p. 88 ED 8
Remote-control time delay needs no turn-off signal ...IFD p. 108 ED 15
Sample-hold amplifier recalls analog input for hours .....PF p. 98 ED 5
Sawtooth frequency range extended by extra transistor IFD p. 83 ED 7
SCR plus zener extend one-shot's time delay .....IFD p. 242 ED 6
SCR-UJT circuit gives economical time delay .....IFD p. 90 ED 8
SCS and UJT form count generator .....IFD p. 82 ED 13
Simple oscillator for high power ....NASA p. 70 ED 5

Simple transition detector has unipolar outputs .....IFD p. 88 ED 10
Simplify dc amplifier design ....AN p. 64 ED 3
Slide-rule procedure directly yields equivalent resistances ....IFD p. 98 ED 4
Small-signal amplifier performance .....ART p. 111 ED 1
Swamp out distortion in wide-range agc systems .....DD p. 72 ED 8
Switch-bridge provides versatile load control .....IFD p. 90 ED 10
System conditions cells selectively ... .NEWS p. 24 ED 15
Take the fog out of field-effect design .....ART p. 38 ED 13
TD improves monostable circuit ....NASA p. 72 ED 5
Three-stage pulse limiter has short recovery time ....IFD p. 86 ED 13
Time-shared readout uses standard logic blocks .....IFD p. 82 ED 7
Transistor bridge circuit monitors two voltage sources ..IFD p. 78 ED 3
Transmission-gate circuit processes video signals .....IFD p. 128 ED 1
Treat the flip-flop logically ....ART p. 48 ED 2
Tristable multivibrator forms 3-phase generator .....IFD p. 84 ED 2
Tunnel diode and transistor form linear monopolar gate .IFD p. 86 ED 8
Tunnel-diode generator calibrates frequency counter ...IFD p. 63 ED 14
UJT, flip-flop form stable, 20-second one-shot .....IFD p. 86 ED 3
UJT pulse generator makes bistable multi more versatile IFD p. 246 ED 6
Vacuum photo-diode constitutes simple, accurate current source .....IFD p. 60 ED 14
Variable pulse limiter uses few components .....IFD p. 94 ED 10
Variable-speed photochopper generates teletype signals IFD p. 246 ED 6
Voltage comparator is also sensor .....NASA p. 241 ED 6
Voltage, current transients suppressed by relay .....IFD p. 88 ED 13
Widen multivibrator ranges ....ART p. 66 ED 10

Communications

Dual MOS-FET simplifies FM multiplex decoder .....IFD p. 78 ED 5
Estimate the solar noise..... .....ART p. 56 ED 7
Find the received signal level .....ART p. 84 ED 4
New system transmits documents by telephone .....NEWS p. 32 ED 13
Pick a delay equalizer..... .....ART p. 62 ED 13
Receiving unwanted signals? ....ART p. 50 ED 4
Replace expensive coils with pulse transformers in phase-lock detectors .....ART p. 82 ED 15
Showdown near on airborne phone system .....NEWS p. 17 ED 3
Telephone system uses time-sharing .....NEWS p. 22 ED 14
Two-stage network provides 60-dB agc .....IFD p. 84 ED 7

Components

Chopper-stabilized amp has superior price/specs ratio ..PF p. 84 ED 5
Cryogenic dc transformer ....NEWS p. 24 ED 4
Differential op-amp has Schmitt trigger applications ...PF p. 124 ED 4
Guide to crystal selection..... .....ART p. 48 ED 11
New panel-meter mounts with nothing behind the panel but terminals .....PF p. 108 ED 7
Paris electronics show dominated by ICs .....NEWS p. 17 ED 5
Silent stepping relay? ....ART p. 60 ED 11
Solar cells charge operational amplifier .....PF p. 88 ED 11
Stepless control with a $1 Triac .....PF p. 116 ED 8
Testing coaxial cables..... .....ART p. 62 ED 4
Try capacitance transducers ....ART p. 188 ED 6
Varactor bridge op-amp provides picolevel performance PF p. 140 ED 15
Will a switch fail? ART p. 58 ED 10

Computers, Data Processing and Auxiliary Devices

A/D converter goes adaptive ....ART p. 78 ED 4
Analog desk-top computer designed for economy .....PF p. 106 ED 2
Cascade circuit arrangement generates sequential pulses..... .....IFD p. 82 ED 2
Circuit protects memory against power interruptions ..IFD p. 84 ED 13
Complement of exclusive-OR ....ART p. 48 ED 3
Computers aid circuit design .....SR p. 96 ED 1
Computers control Sky Bus .....NEWS p. 40 ED 6
Computer speaks with "optical voice" .....NEWS p. 47 ED 15
Computer wires chip with discretion .....NEWS p. 32 ED 6
Data system has automatic error detection .....NEWS p. 32 ED 6
Dial a computer for design information at NAA ....NEWS p. 26 ED 2
Fast, free-running pulses generated by tunnel diode ....IFD p. 88 ED 2
Forty-eight column high-speed alphanumeric printer PF p. 122 ED 3
Miniature 14-bit A/D converter gives 2 microseconds per bit ....PF p. 110 ED 4
Modified monostable flip-flop has improved duty cycle ..IFD p. 81 ED 3
Neurons generate parity..... .....ART p. 70 ED 15
One-bit comparator uses FETs .....ART p. 58 ED 13
Simplify NAND-circuit synthesis .....ART p. 203 ED 6
Tristable multivibrator forms 3-phase generator .....IFD p. 84 ED 2
UJT, flip-flop form stable, 20-second one-shot .....IFD p. 86 ED 3
Unique laboratory customizes computer systems ....NEWS p. 26 ED 11

Consumer Electronics

Bat-like detectors to direct traffic .....NEWS p. 32 ED 15
CdS photocells smooth electronic-organ transients ...IFD p. 84 ED 13
Coin operates SCR-type electronic dispenser .....IFD p. 90 ED 2
Computer speaks with "optical voice" .....NEWS p. 47 ED 15
Deflection amplier shows high

efficiency, linearity IFD p. 88 ED 10
Electric cars .....SR p. 17 ED 13
Electronic eavesdropping devices ... .SR p. 34 ED 15
Electronic pop-op art pops on the scene .....NEWS p. 42 ED 1
Electronics at the Boat Show .....NEWS, p. 34 ED 4
Electronic typesetting combines computer and TV techniques ....NEWS p. 24 ED 15
Focus '66: $18 billion for electronics .....NEWS p. 17 ED 1
New FETs replace tubes ....ART p. 196 ED 6
Phono cartridge uses strain gauge .. ..NEWS p. 26 ED 11
3-D television is still a long way off .....NEWS p. 28 ED 11
Transmission-gate circuit processes video signals .....IFD p. 128 ED 1

Controls, Automatic

Alarm circuit replaces large nonpolar tantalum capacitor IFD p. 86 ED 2
Coin operates SCR-type electronic dispenser .....IFD p. 90 ED 2
Cure force-transducer inaccuracies .....DD p. 98 ED 15
Device-hunting for motor speed control? .....ART p. 38 ED 11
Difference amplifier forms short-circuit detector .....IFD p. 84 ED 3
Differentiator noise is no problem .....ART p. 92 ED 15
Full speed ahead for high-speed trains .....NEWS p. 22 ED 6
Heat detector uses fiber optics ....DD p. 66 ED 2
Keep sampled-data systems accurate .....ART p. 54 ED 13
Neon lamp arrangement forms 60-Hz divider .....IFD p. 76 ED 3
SCRs control truck motors ....NEWS p. 26 ED 1
Shunt-motor speed control ....ART p. 56 ED 2
Simplify dc amplifier design ....AN p. 64 ED 3
Speed control-system response ....ART p. 68 ED 8

Editorials

Craftsmanship is the mark of the professional engineer..... .....EDIT p. 41 ED 10
Dispersal—one answer to civil defense .....EDIT p. 47 ED 4
Engineers are too often silent on major social issues ..EDIT p. 43 ED 8
Here are some winners ... And here are some losers ..EDIT p. 29 ED 7
Is electronics doing enough for puzzled astronomers..... .....EDIT p. 35 ED 5
It's the engineer's job to bring order out of chaos .....EDIT p. 63 ED 6
Making the proper first impression .....EDIT p. 35 ED 11
Need better calibrations? Then, speak out! .....EDIT p. 35 ED 13
The year to do yourself a favor .....EDIT p. 39 ED 2
Training for tomorrow's jobs must begin today .....EDIT p. 67 ED 15
" 'True democracy' will be based on electronic voting" EDIT p. 63 ED 1
We're indebted to you..... .....EDIT p. 41 ED 3
What's happening in computer-aided design? .....EDIT p. 31 ED 14

Measurements, Instruments and Test Equipment

Build a tone-burst generator ....DD p. 104 ED 4
Buying a spectrum analyzer? ....ART p. 218 ED 6
Crystal and recovery diode used in RF calibration .....IFD p. 104 ED 15
Curve-tracer test jig matches diodes quickly .....IFD p. 252 ED 6
Difference amplifier forms short-circuit detector .....IFD p. 84 ED 3
Equipment for blind engineers .....NEWS p. 52 ED 6
Heat-aging detects transistor failure .....NEWS p. 20 ED 15
Industry standards picture confused .....NEWS p. 17 ED 11
Iron mightier than pen for polaroid data marking ....IFD p. 78 ED 3
Low-power precision calibrator gives rms, peak and dc .PF p. 101 ED 7
Memory tester uses 5-MHz IC logic .....PF p. 98 ED 10
Null-detector digital voltmeter adjusts itself .....PF p. 92 ED 5
Phase-shift oscillator measures inductance precisely ....IFD p. 106 ED 15
Photomicrography is a powerful tool .....ART p. 59 ED 7
Preprogramed transistor classification system .....PF p. 112 ED 13
Show off your display system .....ART p. 46 ED 5
Small-capacitor measurements ....ART p. 52 ED 3
Testing coaxial cables ....ART p. 62 ED 4
Transistor bridge circuit monitors two voltage sources ...IFD p. 78 ED 3
True rms differential voltmeter gives 0.05% accuracy, digital read-out .....PF p. 98 ED 7
Twenty-five-MHz oscilloscope with zero dc drift .....PF p. 90 ED 3
Two-channel function generator gives sines and cosines ..PF p. U168 ED 6
Use magnetic deflection to iron out problems in display systems .....ART p. 210 ED 6
Variable resistor for precision uses .....PF p. 104 ED 8
Voltage and phase-angle measurements, 1 MHz-1 GHz ....PF p. 120 ED 4
Volt/ratiometer features accuracy and stability .....PF p. 78 ED 11
Wideband true rms/dc converter covers 20 Hz-100 kHz ....PF p. U142 ED 6

Medical Electronics

Braille devices aid blind engineers .....NEWS p. 52 ED 6
Design deficiencies cited in medical electronics ....NEWS p. 17 ED 14
Electronics in medecine still challenges engineers NEWS p. 48 ED 6
Medical electronics fights heart disease .....NEWS p. 21 ED 10
Sensor detects eyeball movements ....NASA p. 77 ED 5
Speech compressor adapted to "speed-hearing" for the blind ....NEWS p. 27 ED 2

Microelectronics

Avoid over-integration ....ART p. 56 ED 3
Chips falling the right way .....SR p. 85 ED 1
Crowbar circuit protects expensive IC components .....IFD p. 89 ED 10
D/A converter uses thin-films ....ART p. 48 ED 14
Design a transformerless chopper .....ART p. 54 ED 11
Dual MOSs handle microvolt sampling .....PF p. 146 ED 1
Flat-pack carrier speeds production .....PF p. 114 ED 3
Half-a-meg resistance on a chip .....PF p. 96 ED 5
IC breadboard allows bench assembly with the drop of a dot ....PF p. 66 ED 14
ICs for bounceless push-button switching .....IFD p. 62 ED 14
It's what's up front that counts .....ART p. 40 ED 7
Lack of inductors blocks microwave ICs .....NEWS p. 21 ED 15
Logic family features very low power dissipation .....PF p. 104 ED 7
LSI highlighted at solid-state conference .....NEWS p. 17 ED 6
Microwave ICs are on the horizon .....NEWS p. 34 ED 1
More and more on a chip .....NEWS p. 4 ED 7
MOS arrays diffuse into commercial market .....NEWS p. 22 ED 2
Need a small power inverter? ....ART p. 62 ED 10
Output circuit increases noise immunity of ICs .....IFD p. 66 ED 11
Paris electronics show dominated by ICs .....NEWS p. 17 ED 5
Photomicrography is a powerful tool .....ART p. 59 ED 7
Planning to use MOS arrays? ....ART p. 42 ED 2
Put a computer on a chip? ....SR p. 90 ED 1
Saw cuts IC wafers without touching .....NEWS p. 26 ED 11
Thick or thin films: panel debates pros and cons .....NEWS p. 24 ED 13
Try IC gate-ring counters! ....ART p. 56 ED 4
Use an IC counter next time! .....ART p. 62 ED 8
Why use IC gate ring counters? .. ..ART p. 52 ED 5
Wire modules fast with sticks and stacks .....NEWS p. 21 ED 8

Microwaves

ABC of dummy loads..... .....ART p. 60 ED 5
Antenna-beam offset improves radar resolution .....IFD p. 92 ED 10
Coupling-irises arrangement solves microwave filter need IFD p. 84 ED 8
Cut radar hardware needs and costs .....DD p. 76 ED 8
Design efficient multipliers ....ART p. 44 ED 3
Diamond dies are cut by ruby laser .....NEWS p. 21 ED 2
Fewer dramatics, more uses for lasers .....NEWS p. 21 ED 11
Germanium planar transistor outdoes TWTs .....PF p. 88 ED 5
Good diode phase-shifter ....ART p. 46 ED 13
Gunn-effect devices invade millimeter bands .....NEWS p. 28 ED 8
Lack of inductors blocks microwave ICs .....NEWS p. 21 ED 15

Microwave ICs are on the horizon .....NEWS p. 34 ED 1
Microwave parley sees room for IC growth .....NEWS p. 21 ED 15
Microwave power race subsiding .....NEWS p. 23 ED 10
Microwaves study rocket plumes .....NEWS p. 24 ED 14
Millimeter wave switch operates in 2.5 ms .....PF p. 96 ED 2
Modular microwave source covers 0.25 to 40 GHz .....PF p. 106 ED 10
Pace of Gunn-effect research quickens .....NEWS p. 17 ED 2
Parametric amplifier.....NEWS p. 28 ED 4
Simple optical radar fires like a spark plug .....NEWS p. 26 ED 13
Solid-state invades microwaves .....SR p. 67 ED 1
Switch high power with diodes .....ART p. 118 ED 1
Transmission losses .....ENG DATA p. 124 ED 1
Use ferrite phase-shifters .....ART p. 34 ED 14

Missiles and Space

ACME flaw spotter to check big radio dishes .....NEWS p. 35 ED 6
ESSA: technical and meteorological success .....NEWS p. 17 ED 10
First the Moon, then Mars .....SR p. 72 ED 1
Jet engines power satellite ground station .....NEWS p. 28 ED 11
Navy elevates deep-submergence program .....NEWS p. 21 ED 3
Plotting the ocean's profile .....SR p. 80 ED 1
Radio controlled parachutes .....NEWS p. 46 ED 6
Reaching for the Moon . . . and beyond .....SR p. 30 ED 7
Solutions sought for deep-space link problems .....NEWS p. 21 ED 5
Spacecraft designers plan for unmanned exploration of Mars .....NEWS p. 26 ED 15
Undersea atom power: wave of the future .....NEWS p. 20 ED 7

Packaging

Molded spacer protects transistors .....NASA p. 100 ED 8
Mount improves transducer accuracy .....NASA p. 58 ED 14
Package electronic modules with shrinkable tubing .IFD p. 68 ED 11
Simple splash-proof guard protects printed circuits ....IFD p. 94 ED 4
Sleeve for RF cables bridges shielding gap .....NASA p. 74 ED 11

Power sources

Are you up on power supplies? .....NEWS p. 26 ED 8
Current transformer protects regulator against overloads ..IFD p. 104 ED 15
Do you know when to consider a custom power supply? ART p. 20 ED 9
Heat-pipes to convert thermal energy into electricity ..NEWS p. 18 ED 15
Lithium batteries promise high yields .....NEWS p. 28 ED 3
Low-voltage supply replaces small batteries .....IFD p. 64 ED 11
New trends are emerging in power supply design ....ART p. 24 ED 9
Programable power supply regulates 1 μA .....PF p. U158 ED 6
Seventy watthours per pound from regenerative fuel cell .....NASA p. 73 ED 11
Thermocouple power source guarantees safe control device .....IFD p. 88 ED 7
Use a systematic approach to buying a power supply ...ART p. 14 ED 9

Production Processes and Cooling

ACME flaw spotter to check big radio dishes .....NEWS p. 35 ED 6
Computer wires chip with discretion .....NEWS p. 32 ED 6
Laser holography may bring major wafer-making breakthrough .....NEWS p. 17 ED 15

Reliability

Guarantee circuit performance! .....ART p. 70 ED 4
National role for reliability .....NEWS p. 22 ED 4

Research and Development

Ceramic laser tube .NEWS p. 38 ED 1
Cheap tools for budding physicists .....NEWS p. 26 ED 5
Electro-optical reader automatically sorts P.O. letters ..NEWS p. 30 ED 1
Flame amplifies sonic energy .....NEWS p. 50 ED 1
Giant pulse lasers emit high-intensity beams .....NEWS p. 20 ED 8
Infrared aimed laser radar prototyped for Army .....NEWS p. 50 ED 1
Plastic fiber optics NEWS p. 23 ED 15
Plotting the ocean's profile .....SR p. 80 ED 1
Sensor detects eyeball movements .....NASA p. 77 ED 5
Spacecraft designers look ahead to Mars .....NEWS p. 26 ED 15
Speech compressor adapted to "speech-hearing" for the blind .....NEWS p. 27 ED 2
Superconductive atom smasher at SRI .....NEWS p. 38 ED 1

Semiconductors and Solid-State Devices

Amplifier has 85% efficiency .....ART p. 38 ED 5
Batch diodes apply beam-lead method .....NEWS p. 26 ED 3
Chips falling the right way .....SR p. 85 ED 1
Choosing ICs needn't be a chore .....ART p. 170 ED 12
Combine reverse agc with diodes .....DD p. 72 ED 10
Design efficient multipliers .....ART p. 44 ED 3
Device-hunting for motor speed control? .....ART p. 38 ED 11
Electroacoustic amplifiers about to leave laboratory? NEWS p. 17 ED 8
FET operating at uhf? .....ART p. 48 ED 7
For the how, why and where of FET usage, consult parameters .....ART p. 94 ED 12
Forward with backward diodes .....ART p. 44 ED 10
Germanium FET goes plastic, bears $1 price tag .....PF p. 120 ED 15
Germanium planar transistor outdoes TWTs .....PF p. 88 ED 5
Guarantee circuit performance! .....ART p. 70 ED 4
Gunn-effect devices invade millimeter bands .....NEWS p. 28 ED 8
Hot-carrier diode opens new vistas .....ART p. 178 ED 6
In choosing diodes, don't settle for second-best ....ART p. 156 ED 12
Inexpensive transistor functions as low-TC reference diode .....IFD p. 100 ED 4
Junction-switching FET has 30-ohm on-resistance .....PF p. 144 ED 1
Large-signal FET amplifiers? .....ART p. 102 ED 1
Low-cost 5-watt laser diode.....PF p. 94 ED 13
LSI highlighted at solid-state conference .....NEWS p. 17 ED 6
New FETs replace tubes.....ART p. 196 ED 6
New process boosts gallium arsenide devices .....NEWS p. 21 ED 14
Novelty abounds at solid-state conference .....NEWS p. 17 ED 4
Parameters key applications, govern transistor selection.....ART p. 10 ED 12
Photodiode and transistor read cards and tape .....PF p. 114 ED 2
Plastic UJT in planar form has low leakage .....PF p. U110 ED 6
Power FETs headed for wide expansion .....NEWS p. 17 ED 7
Predict common-emitter performance .....ART p. 52 ED 10
SCRs control ac truck motors .....NEWS p. 26 ED 1
Selecting thyristors to fill a control need .....ART p. 144 ED 12
Shunt-motor speed control .....ART p. 56 ED 2
Simplify dc amplifier design .....AN p. 64 ED 3
Simplify low-frequency FET designs .....ART p. 86 ED 15
Stepless control with a $1 Triac .....PF p. 116 ED 8
Treat the flip-flop logically .....ART p. 48 ED 2
Two-hundred MW at 2 GHz from this microwave oscillator.....PF p. 114 ED 4
Use the UJT that does the job best .....ART p. 114 ED 12

Telemetering

Analog-to-frequency converter has improved linearity, range .....IFD p. 248 ED 6
Test system uses telemetry data .....DD p. 80 ED 8
